**APPLE 50mm TO PREHARVEST SAMPLE SUBMITTAL FORM**

LAB # (Office use only)	Sample ID	Variety	# Fruitlet sampled	Age of Tree	Tree vigor, crop loading (light, Med, Heavy)

**FRUITLET SAMPLING PROCEDURE**

- The fruit must be representative to the crop in question. Please follow the guidelines given.
- Avoid sampling from trees adjacent to shelter belts, end rows, replacement trees, pollinators or abnormal areas.
  - 20 Fruitlets per sample is recommended. The Fruitlets should be taken one per tree (20 fruitlets from 20 trees)
  - Fruitlets should be larger than 50 mm, but smaller than pre-harvest (2 weeks prior to harvest)
  - Sample from N,S, E,W sides of the trees to ensure sample is representative
  - Collect approximately shoulder or eye height
  - Avoid Fruitlets showing any physical damage, disorders or abnormalities unless these characteristics are throughout the crop.
  - Avoid unusually large or small fruitlets. The sample should comprise Fruitlets that would develop into average size graded fruit.
  - Identify and or mark the trees that have been sampled for future reference.
