<u>Sampling Instructions</u>	<u>Fertility Codes</u>
<p>Sampling: Take several samples approximately 4-6" deep around the area to be tested using a soil probe, trowel, or shovel. Mix together thoroughly in a clean bucket and transfer 1-2 cups of soil into a labeled quart bag. Submit a separate sample for each unique area (garden, lawn, flowers, etc.).</p> <p>Packing & Shipping: Complete this form with a separate line for each sample, making sure the Sample ID matches what's written on the sample bag. Package the sample(s) in a box with this form and ship them via your preferred method to the address above.</p> <p>• A detailed <i>Soil Sampling for Home Lawns & Gardens</i> guide is available on our website under "Publications". For additional questions, please call our client services or agronomy staff at the number above.</p>	<p><u>Lawns (Primary Grass Type)</u></p> <p>Bahia - 512 Bermuda - 524 Bluegrass - 533 Carpetgrass - 541 Centipede - 546 Fescue - 563 St. Augustine - 576 Zoysia - 583</p> <p><u>Gardens & Landscape Areas</u></p> <p>Garden - 340 Bulbs - 705 Flowers - 725 Roses - 725 Shrubs - 680 Trees - 685 Shrubs-Acid Loving (Azaleas, etc) - 681 Trees-Acid Loving (Pines, etc) - 686</p>
