SAMPLE INFORMATION – SELECT BLUEBERRIES REPRESENTATIVE OF CROP STATUS, SUBMISSION SIZE – 2 CUPS (16 oz.)

LAB # (Office use only)	Sample ID	Variety	# of Blueberry Clusters Sampled	# of Days After First bloom	Loading on Bushes (light, medium, heavy)

FRUITLET SAMPLING PROCEDURE

- The fruit must be representative to the crop in question. Please follow the guidelines given.
- Avoid sampling from bushes adjacent to end rows, replacement bushes or abnormal areas.
 - Take samples along mid height of bush.
 - Identify and or mark the bushes that have been sampled for future reference.
 - Make sure that the sample submitted is representative of current crop state, i.e. if the crop varies in color (green, pink, blue), samples submitted to the lab should reflect this as well.
 - Take care in packaging the blueberry fruit so as to minimize damage during transport. This includes shipping samples in a Styrofoam cooler to avoid heat damage. Expedite shipping to Agri Analysis.
